WE ARE HERE FOR YOU FOR OVER 20 YEARS

MB TECH BB s.r.o. has a rich history on the Slovak market, where it has been operating since 2003. Our beginnings in Banská Bystrica were focused on the sale and servicing of refurbished computer equipment.

However, we gradually expanded our range of activities to include wholesale, which became our main activity. Today we are a leading wholesale supplier of competitively priced products on the Slovak, Czech, Hungarian, Croatian and Polish markets. At the same time, we never lose sight of our continuous effort to satisfy our end customers.

Our company is built on the fundamental principles of product quality, active communication, professional services, competitive prices and environmental responsibility.

In our portfolio you will find only products we have verified ourselves, which put quality, performance and price first, combined with above-standard services. This philosophy has helped us gain the loyalty of many corporate and individual customers, securing our leading position on the market.

At edu.techsavers, we offer **comprehensive solutions for modernising school computing technology**, ensuring that the educational process keeps pace with modern trends and technologies.

In addition to refurbished Techsavers products such as laptops, computers and monitors, the edu portfolio also includes **brand-new, cutting-edge interactive technologies** that transform teaching into a digital form and make it interactive and fun.

We also offer **additional equipment and services** that teaching today simply cannot do without.

With us, you get not only high-quality products, but also a partner in the form of your **expert consultant**, who will always be at hand. We believe that by joining forces, we can take education to the next level.

Guaranteed availability of spare parts for up to 4 years

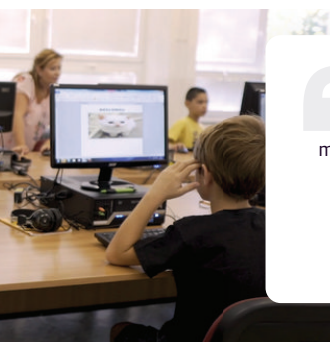

Complaints handled within 7 days

Professional installation of interactive systems

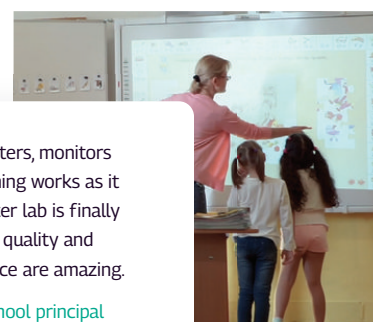

Training for any interactive system

We are very pleased to be working with your company. The equipment we purchase from you helps us improve and modernise the educational process. We can always rely on your sales representatives. Our orders are handled quickly and to our complete satisfaction.

Mgr. Jana Gaňová school principal (ZŠ s MŠ F. J. Fugu-Vinné)

Thanks for the computers, monitors and keyboards. Everything works as it should and our computer lab is finally up and running. The quality and performance for the price are amazing.

Martin Kokoruďa school principal (SPŠ technická-Spiřská Nová Ves)

We have been professionally refurbishing computer equipment since 2003. Under the Techsavers brand, we **give a new life to premium laptops, computers and other computer equipment**. These are top-of-the-range models from HP, Lenovo, Dell and Fujitsu-Siemens. Thanks to our state-of-the-art technology and rigorous

refurbishment process, we have already refurbished **more than 385,000 devices**. We also operate in the Czech Republic, Poland, Hungary and Croatia. Today, we offer our customers world-class refurbishment and the same benefits as when buying new products.

Techsavers computing technology

Classification by visual condition

We refurbish our devices to strict ISO 9001 and internal standards so that they are comparable to new ones. The grades differ only in appearance. Every product is 100% functional.

VISUAL CONDITION
As new

AS NEW

The devices are in 100% condition, with minimal, tiny scratches on the body. The display is free of any defects. Overall, the device is 100% functional.

Most popular

VISUAL CONDITION
Very good

VERY GOOD

The devices are 100% functional. The bodies of refurbished devices in this condition show more visible signs of use. Minor imperfections may also appear on the display, but they are almost invisible once the display is switched on.

VISUAL CONDITION
Fair

FAIR

The devices are 100% functional, but show more noticeable and visible signs of wear.

Techsavers computing technology

Classification by visual condition

We refurbish our devices to strict ISO 9001 and internal standards so that they are comparable to new ones. The grades differ only in appearance. Every product is 100% functional.

VISUAL CONDITION
As new

AS NEW

The devices are 100% functional. The computer is in flawless condition and looks like new, with no signs of previous use.

Most popular

VISUAL CONDITION
Very good

VERY GOOD

The devices are 100% functional. The computer may show more visible, but still only minor cosmetic signs of previous use (mostly on plastic parts). A film may be applied to metal parts, after which the metal part looks excellent.

VISUAL CONDITION
Fair

FAIR

The devices are 100% functional from a technical point of view. The computer shows more visible signs of wear (with no effect on functionality). It may have cracks, deformations or missing plastic parts. Ideal for placement under a desk, where visual imperfections do not matter. The hardware is in 100% condition, ready for immediate use.

EliteBoard interactive whiteboards

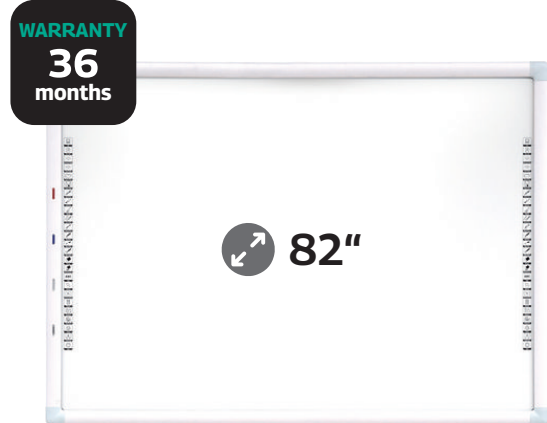

The high-quality aluminium frame with a white finish gives the board a stylish look. The 10-point EliteBoard technology responds reliably and quickly to touch with an interactive pen or a finger, and can respond to the touch of up to 5 users at the same time! On the sides of the board there are strips with icons of the most frequently used tools, making control even more intuitive.

Triptych boards

A three-part magnetic triptych board with a highly durable ceramic surface of the highest quality, suitable for intensive writing. The e3 ceramic surface is designed for maximum durability – the ideal choice not only for schools and educational institutions. Thanks to its quality, it is practically indestructible in normal use. The surface is very easy to wipe clean, scratch-resistant and easy to maintain. The perimeter of the board is finished with an elegant frame made of an anodised aluminium profile in a silver shade with grey plastic corners.

Ceramic-magnetic boards

Magnetic boards for markers or chalk with a highly durable ceramic surface of the highest quality. The ceramic surface is suitable for the heaviest use, not only in schools and educational institutions, but also in offices, meeting rooms and public spaces where maximum durability and long service life are required. The surface is very easy to wipe clean, scratch-resistant and easy to maintain. A mounting kit for wall installation is included.

Vertical slide

A professionally engineered aluminium structure suitable for all ceramic boards, including the interactive whiteboard. The stand is designed for wall anchoring. The entire assembly is fully matched in design. The aluminium column structure is complemented by cover plates in an anodised aluminium finish. High comfort, quiet and smooth board movement throughout the entire service life of the product. More than half a metre of vertical board travel. Easy installation and minimal maintenance. An aluminium storage shelf can be ordered for the lifting stand, allowing convenient raising and lowering of the mounted board (the board is not included with the stand).

KERAMIK LASER
interactive set

EPSON EB-760Wi

KERAMIK interactive sets are a solution in which the interactivity itself is provided by the projector - in this case the EPSON EB-760Wi interactive projector.

Touch control is possible using the interactive pen included in the projector/set package. Alternatively, a touch unit for controlling the screen with your finger can be purchased separately.

Configure the board wings to suit your needs.

Cutting-edge 3LCD technology from the market leader

There is a reason why Epson sells more projectors than anyone else.

It combines high colour brightness with a wide colour gamut thanks to 3LCD technology. Colours can be up to three times brighter than with 1-chip DLP projector technology.

We only offer EPSON data projectors designed specifically for school environments. The reason is the advanced 3LCD technology, which is the only one suitable for use with interactive whiteboards in schools and in any environment where various colour materials need to be presented. Projectors with DLP projection technology, which is not capable of displaying colours with sufficient quality, are even banned for schools and educational institutions in some EU countries!

We buy it. We refurbish it.

Have a laptop, computer, tablet or mobile phone you no longer use?

We will buy it from you.

How does the buyback work?

1. Fill in the online form

Fill in the form at the link below. It will take you less than 2 minutes.

2. Receive an offer

We will send you a non-binding price offer as soon as possible.

3. Send us the device

If you agree with the price offer, send us the device and we will inspect it.

4. We pay you

We will send the money to your account or credit it as store credit for shopping with us. If you choose credit, you get a +20 % bonus on the buyback price.

Example: If your device is worth 100 €, you will receive credit of up to 120 € for shopping in the Techsavers e-shop.

More info at:

www.techsavers.com/buyback

How to make a complaint

1. In your web browser, go to edu.techsavers.com
2. In the menu, click on "Warranty verification"
3. Then continue according to the instructions. Registered customers can submit a complaint via documents, where they can also track its progress.

EXTEND THE WARRANTY ON YOUR DEVICES

Are you worried that your warranty will expire soon and you do not want to invest in new equipment?

Don't worry! With our warranty extension service, you can enjoy peace of mind for years to come.

Extend the warranty on your computer, laptop or other equipment purchased from us by **+1, +2 or even +3 years** and gain the certainty that your computer or other equipment will be protected even after the standard warranty expires. You will avoid high repair and service costs.

Who is it for?

The offer is intended mainly for devices whose warranty is about to expire.

How much does it cost?

Warranty extension by 1 year = 10% of the device price.

If you are not sure when your warranty expires, check it here:

techsavers.com/warranty-verification

Extend the life of your device. Contact us and choose a warranty extension tailored exactly to your needs!

We take care of the environment about the disposal of school equipment

Take advantage of our service for collecting discarded computer equipment and rest assured that it will be handled responsibly and ecologically.

We protect the environment by properly recycling computer equipment.

For all schools to which we supply school equipment, we offer the option of removing discarded equipment. We care not only about the quality of the equipment we supply, but also about the responsible recycling of the equipment we replace. This service can be offered to you by our sales representative.

recycling of discarded computer equipment with our partners
