

ELITEBOARD DC96+10 TOUCH

Interactive whiteboard

FROM NOW ON YOU WILL NO LONGER NEED TWO BOARDS. ONE INTERACTIVE BOARD (WRITABLE WITH MARKERS) WILL BE ENOUGH FOR YOU.

You can use the ELITEBOARD D96+ 10 Touch interactive whiteboard as a classic ceramic board, and when you want, switch it to interactive mode to engage your students. It has a stylish high-quality aluminum frame with a white surface finish. The 10-point technology reliably and quickly responds to touch both with the interactive pen and finger, supporting up to 5 users touching simultaneously. The certified, hard, and highly durable ceramic surface also allows writing with a regular erasable marker.

The board comes with unique Slovak software offering many functions for engaging and creative teaching. On both sides of the board, there are strips with icons of the most used tools for intuitive use. It supports gesture controls like rotation and zoom, similar to smartphone usage. On the right side, there are three color-coded interactive pens and one pen serving as an eraser.

PHYSICAL SPECIFICATIONS

BRAND	Eliteboard
MODEL	DC96
SIZE	96"
TECHNOLOGY	INFRARED
PASSIVE AREA	2117 x 1269mm
ACTIVE AREA	2020 x 1172mm
ASPECT RATIO	16:9
